SIX3 TILE

Six3 Tile®
PRODUCT SPECIFICATIONS

Six3 Tile is an innovative, patented tile product that is a single, integrated system providing the classic look and feel of traditional ceramic tile without the need for costly specialized skills or tools.

Ideal for bathroom tub surrounds, showers, kitchen backsplashes and walls, these lightweight, flexible yet durable large format sheets install with a speed that is unmatched, resulting in a cost-efficient, professional look in about an hour.

Six3 Tile is also fully customizable to produce virtually any tile pattern and color - including complex designs and custom logos.

Water Vapor Permeance, ASTM E96:	<0.5 perms

APPLICATION

VERTICAL, INDOOR APPLICATION ONLY! Approved for use as a stove backer near or behind a cooking range where the heat source is not closer than 6 inches. Not approved for flooring, load bearing or outdoor applications.

Interior Ceramic Tile Substitute complying with the following:
    Type: Mold and mildew resistant polyvinyl chloride (PVC).
    Thickness: nominal ¼ inch (6 mm).
    Finished Coating: Polyurethane Enamel.
    Board Size: various depending on application.
    Meets IBC Section 307.2, Bathtub and shower spaces.
    Meets HUD Code Section 3280.202 with subsection 3280.203 Flame spread limitations
    and fire protection requirements.

DELIVERY, STORAGE and HANDLING

Deliver and store products in manufacturer's unopened packaging bearing the brand name and manufacturer's identification until ready for installation.

Store materials on level supports off the ground to prevent sagging. Cover loosely with waterproof material to prevent condensation from forming while protecting against weather, direct sunlight, surface contamination, and construction traffic.

Handle materials to avoid damage to edges and surfaces.

INSTALLATION ACCESSORIES

Six3 Tile® can be installed using standard construction adhesives.

When using grout, as recommended, use only UNSANDED or NON-Sanded grout. Any other grout will likely dull the surface of the **Six3 Tile** product.

Do not use any reciprocating power tools such as jigsaws or sawzalls to cut the product to prevent rough edges along the cut line. If using power tools, use only oscillating or circular saws.

Reference the **Six3 Tile** installation instructions and recommended tools list for further details.
